CERTIFICATES

Front-End Development Diploma

- 7 Months duration
- Issuer: Root Academy
- Technologies: HTML, CSS, JavaScript, React, Next.js, Responsive Design, Git & GitHub
- Built multiple real-world projects during the program

LANGUAGES

Arabic — Native

English — Good

PROJECTS

ShopSphere

Modern E-commerce

A frontend e-commerce web application built with Next.js, integrated with a pre-built Spring Boot / Java 21 backend API. The platform supports three user roles — Customer, Seller, and Admin

GitHub: <https://github.com/mvchnccc-oss/shopsphere-E-commerce-web-Application>

Ecolyro

Live Production Startup — Ecosystem Services Platform

- Built the landing page for Ecolyro, a live, production startup platform offering AI integration, data engineering, e-commerce, and wellness services
- Designed a dark, premium design system inspired by linear.app, including a services page and a six-step process timeline
- Link: <https://www.ecolyro.com>

Divenore

Live Production Startup — Wellness Platform

- Built the landing page for Divenore, a live, production wellness and personal development startup
- Delivered polished hero, story, and call-to-action sections matching the brand's design system
- Link: <https://www.divenore.com>

Nexora Academy

Live Production Startup — Online Education Platform

- Built the landing page for Nexora Academy, a live, production online education startup
- Implemented a redesigned call-to-action section and a contact page integrated with Google Forms, including Egyptian phone number validation
- Link: <https://nexoraacademy.online>

ShopMart

Next.js

- Built a full e-commerce web application using Next.js and Stripe integration
- Implemented advanced cart state management
- Optimized performance and responsive design
- Link: <https://e-commerce-gamma-wine-32.vercel.app/>

SaaS Landing Page

- Designed and developed a high-conversion landing page
- Focused on responsiveness and performance optimization
- Link: <https://company-portfolio-first-progect.vercel.app/>
- Source code available on GitHub
